

Barrel Clamps

Barrel Clamps - A Barrel Clamp is actually a mechanical or hydraulic accessory intended for a forklift. It can be used to squeeze the object you would like to transfer using the lift truck and is often used for handling paper rolls, barrels, and kegs. Several types of barrel clamp accessories likewise have a rotate function. Like for example, the revolving function allows the one operating the forklift to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
