Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, due to its outstanding level of product performance and their consistently high level of client support and service given to all Doosan Infracore Lift Truck users. The U.S. lift Truck division based in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a home-based machinery expansion venture. Product sales of these goods were initially targeted to state-run corporations, large scale organizations, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Daewoo started the first home-based forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a situation of substantial growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales network and started exporting models they had established through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
